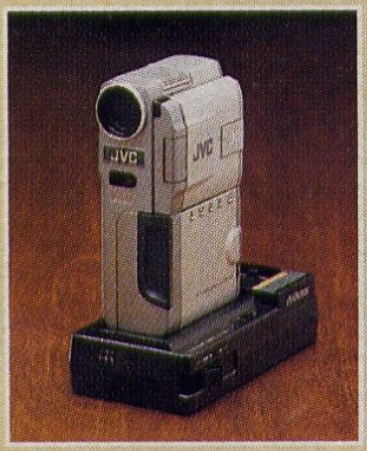
SkyMall® pre



SMALLEST DIGITAL CAMCORDER WITH GLARE-PROOF LCD SCREEN.

Unlike other camcorder LCD screens that fade out in the sunlight, this model is the only one that uses a low temperature poly-silicone, 180,000-pixel screen that can be clearly seen even in direct sunlight. Smaller than a paperback book, it offers a picture quality and sound performance that is far superior to conventional Hi8 or VHS camcorders. The 2.5-inch color LCD monitor's flip-out screen (there's also a built-in viewfinder) has 400 TV lines of horizontal resolution and tilts up or down for high, low and counter angle shooting. Weighing just over one pound, it uses a miniature DV cassette for up to 60 minutes of recording and playback. Its 570,000-pixel, high-resolution CCD ensures enhanced detail and clarity, while a digital image stabilizer eliminates camera shake. Its downsized lens features an optical 10X zoom and a computer chip-enhanced 100X super digital zoom. Camcorder mounts to a docking station (included) which connects to a television or VCR for playback, editing, audio dubbing and special effects. With remote control, AC power adapter/battery charger, tape and all cables.
5" H x 3½" L x 1⅞" D.

Control your Oracle® databases from wireless handheld devices

For the first time, DBAs now have the power to monitor and manage mission-critical databases on-the-go. The pocketDBA™ is a comprehensive wireless solution for database administration needs, from basic routines to critical procedures. With a Palm OS® or Windows CE® handheld, Oracle databases can now be instantly updated, tuned or monitored — from wherever the DBA happens to be. To query or troubleshoot away from the office, DBAs no longer need to spend valuable time getting to desktops, booting up, or dialing in. Companies gain the competitive advantage when databases can truly be managed at all times.
